Jacksonville, Florida | 904-678-4773 | wared.alansari@fscj.edu

Objective

Motivated and certified IT student pursuing a Bachelor of Applied Science in Computer Systems Networking. CompTIA Linux+ and CompTIA Security+ certified with hands-on experience in system administration, hardware/software troubleshooting, security monitoring, and cloud-based infrastructure. Looking to apply technical knowledge, troubleshooting, incident response, problem-solving abilities, and communication skills in a collaborative IT environment.

Education

Florida State College at Jacksonville — Jacksonville, Florida

Associate in Arts

May 2026 | Graduated with High Honors | GPA: 3.9+

Relevant Coursework: Hardware Foundations, Software Foundations, Operating Systems, Networking Fundamentals, Cybersecurity Principles

Florida State College at Jacksonville — Jacksonville, Florida

Pursuing Bachelor of Applied Science in Computer Systems Networking

Expected Graduation: May 2028

Certifications

- **CompTIA Linux+ Certified**
- **CompTIA Security+ Certified**

Technical Skills

Operating Systems: Linux, Windows

Networking & Infrastructure: Network Configuration, Troubleshooting, System Monitoring

Cloud & Containers: Kubernetes (basic understanding), AWS/Azure fundamentals

Tools: Git, Docker, VirtualBox, Microsoft Office (Word, Excel, PowerPoint, Outlook)

Other: Familiarity with Scripting, Security Policies, Security Controls

Experience

Student Worker / Assistant – Student Records

Florida State College at Jacksonville | Jacksonville, Florida | September, 2024 – Present

- Supported college IT and administrative systems by maintaining digital records and ensuring data accuracy.

- Assist students with navigating Florida State College at Jacksonville's student portal.
- Assist staff and students with troubleshooting technology issues and software access.
- Demonstrated attention to detail, organization, and confidentiality while managing sensitive information.

CTS1131 Hardware Configuration Course

- Knowledge of troubleshooting and identifying hardware issues
- Installation of hardware components
- System cleanup and maintenance

CCE0523 CompTIA Secur+ Cert Training Course

- Knowledge in protecting systems from digital attacks
- Distinguishing threat behaviors
- Assessing vulnerabilities

CNT1015C Operating Systems Foundations Course

- Knowledge in utilizing various Linux CLIs of distributions such as RedHat and Ubuntu
- Managing packages
- Writing Bash scripts for automation of daily tasks

Projects

Virtual Machine Lab: Configured and managed Linux and Windows virtual machines to practice practical usage of system administration, network setup, and software installation.

Cloud Computing Fundamentals: Studied core cloud concepts including IaaS, PaaS, SaaS, virtualization, and cloud deployment strategies; gained theoretical understanding of AWS and Azure services.

Linux Server Administration Project: Configured and secured Linux servers; implemented user access controls and automated routine tasks using Bash scripting.

Leadership & Involvement

Student Government Association (SGA) Volunteer

- Assisted in coordinating campus events and tech-driven student initiatives.
- Collaborated with diverse teams to enhance student engagement and communication.

Additional Information

- Passionate about IT infrastructure, security, innovation, and improving digital systems for healthier communities.
